Receipt is acknowledged of this Provisional Application. This Provisional Application will not be examined for patentability. Be sure to provide the PROVISIONAL APPLICATION NUMBER, FILING DATE, NAME OF APPLICANT, and TITLE OF INVENTION when inquiring about this application. Fees transmitted by check or draft are subject to collection. Please verify the accuracy of the data presented on this receipt. If an error is noted on this Filing Receipt, please write to the Office of Initial Patent Examination's Customer Service Center. Please provide a copy of this Provisional Application Filing Receipt with the changes noted thereon. If you received a "Notice to File Missing Parts of Application" ("Missing Parts Notice") in this application, please submit any corrections to this Filing Receipt with your reply to the "Missing Parts Notice." When the PTO processes the reply to the "Missing Parts Notice," the PTO will generate another Filing Receipt incorporating the requested corrections (if appropriate). This Provisional Application will automatically be abandoned twelve (12) months after its filing date and will not be subject to revival to restore it to pending status beyond a date which is after twelve (12) months from its filing date.

Docket No. RA-1828-AL

VERIFIED STATEMENT (DECLARATION) CLAIMING SMALL ENTITY STATUS
(37 C.F.R. §§ 1.9(f) and 1.27(b)) - INDEPENDENT INVENTOR

As a below-named inventor, I hereby declare that I qualify as an independent inventor as defined in 37 C.F.R. § 1.9(c) for purposes of paying reduced fees under Section 41(a) and (b) of Title 35, United States Code, to the Patent and Trademark Office with regard to the invention entitled: SUTURE CLINCH WITH TRACTION ENHANCEMENT, described in:

- ☒ the specification filed herewith;
☐ application serial no. _____, filed _____; or
☐ patent no. _____, issued _____.

I have not assigned, granted, conveyed, or licensed and am under no obligation under contract or law to assign, grant, convey, or license any rights in the invention to any person who could not be classified as an independent inventor under 37 C.F.R. § 1.9(c) if that person had made the invention, or to any concern which would not qualify as a small business concern under 37 C.F.R. § 1.9(d) or a nonprofit organization under 37 C.F.R. § 1.9(e).

Each person, concern, or organization to which I have assigned, granted, conveyed, or licensed or am under an obligation under contract or law to assign, grant, convey, or license any rights in the invention is listed below:

- ☐ no such person, concern, or organization
☒ persons, concerns or organizations listed below*

*NOTE: Separate verified statements are required from each named person, concern, or organization having rights to the invention averring to their status as small entities. (37 C.F.R. § 1.27)

FULL NAME: APPLIED MEDICAL RESOURCES CORPORATION
ADDRESS: 26051 Merit Circle, Suite 103, Laguna Hills, California 92653
☐ INDIVIDUAL ☒ SMALL BUSINESS CONCERN ☐ NON-PROFIT ORGANIZATION

I acknowledge the duty to file, in this application or patent, notification of any change in status resulting in loss of entitlement to small entity status prior to paying, or at the time of paying, the earliest of the issue fee or any maintenance fee due after the date on which status as a small entity is no longer appropriate. (37 C.F.R. § 1.28(b))

I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code, and that such willful false statements may jeopardize the validity of the application, any patent issuing thereon, or any patent to which this verified statement is directed.

VERIFIED STATEMENT (DECLARATION) CLAIMING SMALL ENTITY STATUS
(37 CFR §§ 1.9(f) & 1.27(e))—SMALL BUSINESS CONCERN

I hereby declare that I am:

- ☐ the owner of the small business concern identified below.
☒ an official of the small business concern empowered to act on behalf of the concern identified below.

NAME OF SMALL BUSINESS CONCERN: APPLIED MEDICAL RESOURCES CORPORATION
ADDRESS OF SMALL BUSINESS CONCERN: 26051 Merit Circle, Suite 103, Laguna Hills, California 92653

I hereby declare that the above-identified small business concern qualifies as a small business concern as defined in 13 C.F.R. § 121.12, and reproduced in 37 C.F.R. § 1.9(d), for purposes of paying reduced fees to the United States Patent and Trademark Office, in that the number of employees of the concern, including those of its affiliates, does not exceed 500 persons. For purposes of this statement, (1) the number of employees of the business concern is the average over the previous fiscal year of the concern of the persons employed on a full-time, part-time, or temporary basis during each of the pay periods of the fiscal year, and (2) concerns are affiliates of each other when either, directly or indirectly, one concern controls or has the power to control the other, or a third party or parties controls or has the power to control both.

I hereby declare that rights under contract or law have been conveyed to and remain with the small business concern identified above with regard to the invention, entitled: SUTURE CLINCH WITH TRACTION ENHANCEMENT, by inventor(s): CHARLES C. HART and SAID HILAL, described in:

- ☒ the specification filed herewith.
☐ application serial no. _____, issued _____.
☐ patent no. _____, issued _____.

If the rights held by the above-identified small business concern are not exclusive, each individual, concern or organization having rights in the invention is listed below* and no rights to the invention are held by any person, other than the inventor, who would not qualify as an independent inventor under 37 C.F.R. § 1.9(c) if that person made the invention, or by any concern which would not qualify as a small business concern under 37 C.F.R. § 1.9(d), or a nonprofit organization under 37 C.F.R. § 1.9(e). *NOTE: Separate verified statements are required from each named person, concern or organization having rights to the invention averring to their status as small entities. (37 C.F.R. § 1.27)

SUTURE CLINCH WITH
TRACTION ENHANCEMENT

Background of the Invention

Field of the Invention

5
This invention relates generally to surgical clips and clamps, and clinches adapted for use
10 with sutures.

Discussion of the Prior Art

In the surgical environment, clips and clamps have been used for removably holding two
objects in close proximity. These objects may be tissue or surgical devices such as sutures.
15 Clips and clamps may be of the variety disclosed and claimed by Applicant in U.S. provisional
patent application serial no. 60/040,655, filed March 10, 1997, and entitled "Surgical Clips and
Clamps" Suture clinches of the past are well-represented by Applicant's U.S. patent application
serial no. 09/082,495, filed May 21, 1995, and entitled "Suture Clinch". Both of these
applications are incorporated herein by reference. In the latter regard, a metal clinch is stamped
20 from a sheet of metal and preformed to operate with a clinch applier. The two free ends of a
suture are disposed within the clinch, which is slid down the suture ends until a tight suture is
achieved. Then the applier is activated to reform the clinch binding the suture ends into a fixed
relationship.

In the case of the metallic clinches, the metal-to-suture interface tends to provide a high
25 coefficient of friction that initially inhibits the sliding step of the process. Ultimately, the metal-
to-suture interface may provide a lower coefficient of friction than that desired to lock the suture
ends in a fixed relationship.

Summary of the Invention

30
In accordance with the present invention, a coating is provided on the clip, clamp, or
clinch in order to facilitate one or more of the steps in its operation. With respect to the suture

clinch, the coating is contemplated which would initially facilitate the sliding step by providing a reduced coefficient of friction with the sutures. Another type of coating might provide an increased coefficient of friction with the sutures, thereby facilitating traction-enhancement during the locking step. More than one coating may be applied to facilitate an initial stage, as well as an ultimate stage of operation.

Any coating applied to a suture clinch would tend to function as an occlusive cushion to inhibit abrasion between sharp edges and corners of the clinch and the suture material. For traction-enhancement, any material can be used as a coating to produce an increased coefficient of friction with the suture material. In a preferred embodiment, the material chosen is identical to that of the suture material, since similar or identical materials normally exhibit increased frictional resistance to slipping. A more compliant material might be chosen for the traction-enhancement coating in order to increase the area of contact between the clinch and the suture. By increasing the area of contact, elevated compressive pressures need not be applied to securely hold the suture.

The traction-enhancement coating might also be selected to enhance the holding ability with a reabsorbable suture. This permits those portions of the suture distant from the clinch to be reabsorbed, while the suture in the clinch is protected from the absorption process. In preferred embodiments, the traction-enhancing coating includes plastics such as polypropylene or polyethylene.

A lubricious coating could be applied to facilitate the sliding of the clinch along the suture ends. In this case, a reduced coefficient of friction is desirable. A coating of hydrophilic or hydrophilic-hydrophobic material is contemplated to provide the desired lubricity. In a further embodiment, the clinch is coated with two layers of material in a laminate. The first layer is coated on the metallic clinch to provide traction-enhancement. The second layer is coated on the first layer. Initially, the second layer contacts the suture and provides the desired lubricity for sliding the clinch into place. With the hydrophilic coating, moisture is attracted to provide the desired lubricity. As the second layer is obliterated by movement of the suture during the sliding step, the first substrate is exposed and ultimately compressed against the suture in the locking step. Alternatively, the second layer may be displaced by the compression of the clinch upon the

suture. In either case, once the clinch is operatively disposed in its desired position, the first traction-enhancing coating engages the suture ends to lock the suture.

The coatings can be applied in accordance with any known method for coating objects. Dip-coating is initially contemplated, but dispersions, solid castings, insert moldings, and spraying may also be appropriate. The coatings can be separately formed and adhered to the metallic base in a further process. Typically, the laminate or coating will be applied to the clinch while it is in the flat-formed condition.

The patent applications referenced above are incorporated herein by reference. The associated drawings (copies attached) are merely representative of any type of clip, clamp, or clinch configuration in the prior art.
